MESSAGE FROM PATRONS

Mr. Kantilal Bam,
Chairman,
Icon Education Society

"There are so many people who have great talents, but do not seem to use it. Many times you will be able to easily triumph over those who are gifted but unwilling to work hard enough to cope with your efforts.

Hard work and a good dose of determination can lead you anywhere, even if you are not the most talented in this area. Think about all those super talents in your preferred area of law. Only those talents who are willing to make an effort will be able to succeed. Otherwise, less talented people will outperform them with their boundless willingness to do extraordinary work."

Mr. Akshay Kanti Bam,
Chairman,
Indore Institute Of Law

It is in adversities that we acknowledge the strength of togetherness, in this time when the humanity wages a war for survival against an unseen enemy, it is necessary for us to stand together as one. THEMES OF THE CONFERENCE

THEME I -

Global Pandemic; a boon for Environment & Planet Myth or Reality?

Concept Note - "The global corona virus pandemic, which has already caused unimaginable devastation and hardship, has brought our way of life to an almost complete halt. The outbreak will have profound and lasting economic and social consequences in every corner of the globe," says United Nations Environment Programme (UNEP) Executive Director Inger Andersen. A global pandemic that is claiming people's lives certainly shouldn't be seen as a way of bringing about environmental change either. The effect can be visible in environment clearly for one thing; it's far from certain how lasting this dip in emissions will be. When the pandemic eventually subsides, will carbon and pollutant emissions "bounce back" so much that it will be as if this clear-skied interlude never happened? Or could the changes we see today have a more persistent effect?

SUB THEMES:

- Impact of Covid-19 on global carbon emission-green house effect
- Production of medical waste and its impact on environment.
- Impact of covid-19 on wildlife, biodiversity and habitat
- Environmental policies and planning- national mission for clean ganga
- Social liability and social participation of environment licensing.

Various sectors and services will be impacted negatively over the length and breadth of the country. The government is really trying hard to revive the economy by providing huge relief packages, but undoubtedly it will be challenging.

There is however several innovative opportunities & ventures sprouting in the midst of the Pandemic. It therefore become imperative to deliberate upon the positive and negative impacts on the Global economy due to Covid-19 as this pandemic has really changed our way of living and motivated us to be self-sufficient.

The governments across the globe are forced to impose lock down in order to stop the spread of the disease and thus paralyzing the Tourism business which totally depends upon commutation of tourists. With no revenue since the outbreak of the pandemic and with all the assets remaining utilized/underutilized across the world, the industry is staring at a future which is not only bleak but also very uncertain. There is an opportunity-and imperative-to modernize the justice system. Leaders of some countries have accused other countries for not containing the disease effectively and resulting in the uncontrolled spread of the virus. Developing nations in Latin America and Africa cannot find enough materials for testing for coronavirus disease, partly because other countries in Europe and the United States are outspending the resources.
