Policy on Environment & Energy Usage

INTRODUCTION

The Indore Institute of Law in pursuance of its vision and mission of creating, "Competent Human Legal Professional and Responsible Citizens" has drafted a policy on environment, energy and sustainable development. Holistic education in the 21st century is incomplete without imparting knowledge on living responsible lives. This sense of responsibility should extend to the larger world that we live in. Guided by this principle, the College seeks to inform students on the imperative of environment protection and also affords them an experience of studying in an institution that has adopted sustainable practices in its various functioning.

As the College is situated in the heart of the city of Indore, the staff and students are well-aware of both the various kinds of pollution and its attendant health hazards, and the immediacy and the seriousness of the problem of environmental pollution. For us at Indore Institute of Law, terms like environmental degradation, climate change, are not buzzwords but a part of our lived reality. Located near the industrial town of Pithampur, space constraints make it difficult for us to increase our green cover. But we have adopted measures, both small and large to nurture nature.

OBJECTIVE

The main objective of this policy is to raise environmental awareness among students and staff and promote sustainable practices in the institution.

The GO GREEN CLUB OF IIL shall be responsible for implementation and monitoring of the Green Campus Policy.
